In this regard we invite you to stand by us in this new event:

**The 1st Virtual International Conference on the Relationship between Man
and Cosmos from Science and Religion perspectives**
By ICOANA CREDINTEI/ - CONF. 2017

Conference Aim

In 2017 our programme is dedicated to the topics: Man and Cosmos, Science and Religion.

Religion is and has always been the most paradoxical, intriguing social active factor in the world history since the beginning of human society. The modern era is characterized by three distinct attitudes: 1st - human beings are essentially individuals; 2nd - human reason, that will be later expanded to include the scientific method, is autonomous; and 3rd - human reason is sufficient to answer to our questions and as such, to solve our problems.

The goal of the Virtual International Conference on the Relationship between Man and Cosmos from Science and Religion perspectives is to recover the forgotten unity of Postmodernism's trends, by affirming the transcendental values of faith, philosophy and spirituality.
